

Kvaser
‘Not For New Design’
Announcement

Kvaser AB | Mölndal, Sweden | UPDATE: July 1, 2024

Dear Kvaser customer,

As a benefit to users, Kvaser follows a Not For New Design (NFND) policy on legacy products.

This allows support for older product over extremely long project lifespans.

When a Kvaser product reaches legacy status, it will be designated “Not For New Design” and begin a 12-month period during which customers are encouraged to migrate to new versions of Kvaser products.

NFND products will continue to be available as long as its components are available but expect a longer delivery time and possibly a higher price. The chart below identifies products that are beginning their 12-month NFND phase-out period in July 2024.
