

Environmental Policy

Kvaser is committed to delivering high-quality electronic products and solutions that meet and exceed customer expectations. With over 30 years of expertise in Controller Area Network (CAN) technology, we have established a global reputation for precision, reliability, and durability and we are committed to working towards a future with minimal environmental impact. In a rapidly evolving technological landscape, we are committed to innovation. We continually explore new technologies to keep Kvaser at the forefront of CAN technology and other relevant technologies.

Our Commitments:

- **Continuous Improvement:** We are dedicated to constantly improving our environment management system and we strive to increase efficiency and reduce waste by regularly monitoring, measuring and reviewing performance, setting new goals, and implementing improvements.
- **Compliance:** We are committed to complying with all relevant environmental laws and other binding requirements.
- **Pollution Prevention and Waste Minimization:** We work towards preventing pollution and minimizing waste across all areas of our processes.
